

Parking lot USB exercise

Contents	Write 2-3 sentences about the types of information found on this device. <i>Some of the documents appear to contain sensitive personal information that Jorge likely would not want exposed publicly. The files related to work also include personally identifiable information (PII) belonging to other individuals, along with details connected to the hospital's internal operations.</i>
Attacker mindset	Write 2-3 sentences about how this information could be used against Jorge or the hospital. <i>The timesheets may provide useful intelligence to an attacker about the people Jorge works with. Both personal and professional information could potentially be exploited to deceive Jorge. For instance, an attacker could craft a malicious email that appears to come from a coworker or a family member.</i>
Risk analysis	Write 3 or 4 sentences describing technical, operational, or managerial controls that could mitigate these types of attacks: <i>Increasing employee awareness about these kinds of attacks and teaching staff how to respond to suspicious USB devices is an example of a managerial security control that can help reduce risk. Conducting regular antivirus scans is an operational control that organizations can implement. Another protective measure is a technical control, such as disabling AutoPlay on company computers to stop malicious code from running automatically when a USB device is connected.</i>
